MAXMILLIAN FINLEY

I. INTRODUCTION

On the morning of May 16, 2002, approximately 400 hooded men brutally attacked banana workers on the Los Alamos plantations, owned by the Noboa company in Ecuador. These workers had been on a legal and non-violent strike since May 6th, "protesting for proper working conditions and their rights under Ecuadorian law." Reports indicate that the hooded men banged on workers' doors, dragged roughly eighty of them from their homes, hit many of them with rifles, looted their homes, and threatened to kill the workers and dump them into the river. The armed men remained on the plantation into the early evening, at which time...

they purportedly told all striking workers to "leave the premises by 6:30 P.M. or be forcibly evicted."\(^6\) Shortly after 6:00 P.M., with the workers showing no sign of leaving, the armed men allegedly began shooting, critically injuring one worker, "and causing the subsequent amputation of that worker’s leg. Several others, including a police officer, were also injured."\(^7\) Reports indicate that at 8:00 P.M., police reinforcements finally arrived and arrested approximately twenty of the armed thugs.\(^8\) This violence came almost a year after the Dispute Settlement Resolution\(^9\) in the banana trade sector between the European Union\(^10\) and United States.\(^11\) This circumstance is just one example of a reoccurring theme for Ecuadorian banana unions, as it becomes apparent that the workers lack the power to negotiate for proper working conditions.\(^12\)

7. See Banana Link, supra note 3.
9. "The WTO’s procedure for resolving trade quarrels under the Dispute Settlement Understanding is vital for enforcing the rules and therefore for ensuring that trade flows smoothly. A dispute arises when a member government believes another member government is violating an agreement or a commitment that it has made in the WTO. The authors of these agreements are the member governments themselves [and] the agreements are the outcome of negotiations among members. Ultimate responsibility for settling disputes also lies with member governments, through the Dispute Settlement Body." See World Trade Organization (WTO), Dispute settlement, available at http://www.wto.org/english/tratop_e/dispu_e/dispu_e.htm#negotiations (last visited Jan. 31, 2004).
10. "The European Union (EU) was set up after the 2nd World War. The process of European integration was launched on May 9, 1950 when France officially proposed to create ‘the first concrete foundation of a European federation’. Six countries (Belgium, Germany, France, Italy, Luxembourg and the Netherlands) joined from the very beginning. Today, after four waves of accessions (1973: Denmark, Ireland and the United Kingdom; 1981: Greece; 1986: Spain and Portugal; 1995: Austria, Finland and Sweden) the EU has 15 Member States and is preparing for the accession of 13 eastern and southern European countries." See TakingItGlobal, The European Union On-Line, at http://www.takingitglobal.org/opps/orgdir.html?vieworg=2447 (last visited Sept. 11, 2003).
This note examines the ramifications of the World Trade Organization's Dispute Settlement of the banana trade war on Ecuadorian banana workers. The growing labor rights issues of Ecuadorian banana workers necessitate the United States to take action for the sake of human rights and international democracy. Part II of this Note discusses the history of the banana trade dispute, and the final banana dispute settlement.\textsuperscript{13} Part III examines the effects of increased production in Ecuador on banana workers, the Ecuadorian government's discouragement in the association of labor unions, and the blind eye shown by U.S. multinationals\textsuperscript{14} towards worker's human rights in this area.\textsuperscript{15} Part IV examines how the U.S. government could protect Ecuadorian workers using current U.S. trade policy and U.S. and international law. These measures would enable workers to bring suit against the multinational corporations that are aiding in the denial of their human rights, or would encourage change by the Ecuadorian government through denial of federal aid and trade benefits from the US. Part V concludes that the Ecuadorian labor situation is similar to the U.S. past labor situation, and that history shows U.S. how important free association and labor conditions are to democracy.

\section{II. The Banana Trade}

\subsection{A. The History}

The European Union (EU) is a very significant player in the world banana trade.\textsuperscript{16} The EU imports more agricultural goods

\begin{itemize}
\item \textsuperscript{13} The formal name given to the dispute settlement by the WTO is "US import measures on EC products — Brought by EC DS165." \item \textsuperscript{16} The European Union estimated imports of bananas in 2001 is 3169 thousands tons, which is second largest amount of import only to the US. \textit{Bananas: Commodities Notes, Final Results of 2001}, Food and Agriculture Organization of the United Nations,
from developing countries than the U.S., Japan, Canada, Australia and New Zealand combined and imports about a third of all traded bananas. In fact, the EU is the only major banana market in the world that has any tariffs and limits on volumes imported. Thus, EU policies have a major impact on the world trade in bananas.

Although the EU has a major impact on the banana trade, the three biggest banana producing companies - Chiquita, Dole and Del Monte - together produce and control over two thirds of world exports, allowing them to control the market and set the rules for

---

19. The U.S. and Japan, the next two largest markets, allow bananas in freely, without any tariffs and without limits on volumes imported. See Id. See also Bananadrama 1: The EU Banana Regime, Banana Link, at http://www.banana-link.org.uk/trade/btrade.htm (last visited Jan. 1, 2004).

20. One of the major EU policies is the General System of Preferences (GSP). A total of 142 developing countries benefit from the extensive EU preferences under the recently enhanced GSP. In addition, 77 Africa Caribbean and Pacific countries (ACPs) also benefit from preferential access to the EU market (more than 80% of African exports enter the EU at preferential or zero rates). Furthermore, the EU has concluded free trade agreements with a number of developing countries (these agreements have been made with Mexico, South Africa and Mediterranean countries). This preferential access is reflected in the much higher level of exports from these countries to the EU, compared to other Quad members.” EU Institution Press Release, Facts and figures on EU Trade, supra note 17.

Despite the increase in pressure from some of the major consuming countries to limit their power, these companies still have a very strong influence over the market because of their export sales. Multinationals are extremely powerful in exporting countries, as they drive exporting countries competing with one another for the multinational's favor, forcing governments to implement and accept impositions with regards to taxes, tariff preferences, preferential access to loans, and deregulation of social and environmental policies.

Multinationals also have a strong influence in industrialized countries on the implementation of food and trade policies. An example of one multinational's power is Chiquita, which strongly influenced the formal application filed by the U.S. against the EU's banana import regime to the World Trade Organization in 2004.23

24. Id. Major consuming countries, such as the EU countries, try to limit and alter the multinational's power and behavior through these countries own codes of conduct, legislation and campaigns.
25. Id. The total banana export revenue of the main African, Caribbean, Pacific countries, for instance, is equivalent to 10% of Chiquita's sales. The total projected amount of export in bananas from the ACP countries is 1037 thousand tons. See also EU Institution Press Release, Facts and figures on EU Trade, supra note 17.
26. See Daniel T. Griswold and Aaron Lukas, Cato Handbook for the 106th Congress, Chapter 56, Trade Sanctions, pg. 555, available at http://www.freetrade.org/pubs/handbook/hb106-56.pdf. There is belief by some that foreign direct investment is not only profitable for American shareholders, but that it also helps foster greater economic growth in less developed nations. American companies introduce new technologies and production methods, while raising wages and labor standards. That creation of wealth helps to advance social, political, and economic institutions that are independent of the ruling authorities. (last visited Jan. 22, 2004).
27. Bananadrama 1: The EU Banana Regime, supra note 21.
29. Bananadrama 1: The EU Banana Regime, supra note 21. (*In order to manage the volume of bananas entering the market, the European Union fixed quotas for the different production zones. For imports in excess of the volumes fixed in these quotas, exports incurred a prohibitive tariff to prevent oversupply.}
This course of action taken by the U.S. eventually led to the “Banana War”, and demonstrates Chiquita and other multinationals’ persuasiveness in industrialized countries.\(^{31}\)

### B. The Banana Trade War

A crisis had been brewing in the world trade market since 1993 when the EU imposed a new quota system (the “banana regime”) for banana imports for the purpose of managing the European Market.\(^{32}\) The EU had several objectives when they implemented this system: to harmonize the various pre-1993 national regimes; to protect banana production in EU member states; to supply European consumers with ‘reasonably’ priced bananas; to respect European obligations towards Africa, Caribbean, Pacific countries, as defined by the Lomé Convention,\(^{33}\) in order to support the eco-

The annual ACP banana quota allowed the 12 ‘traditional’ African and Caribbean producer countries to export, tariff-free, up to a maximum annual volume of 857,700 tons - the equivalent of their cumulated, best annual exports before 1992. Volumes were to be allocated to each of the twelve according to a system of licenses, which is an authorization to import for which the trading company applied. The European Commission issues these licenses free of charge.

The annual quota for dollar bananas was initially set at 2 million tons with a tariff of 100 euros per ton. Following negotiations in 1994, the EU with four producer countries signed the so-called Framework Agreement: Costa Rica, Colombia, Nicaragua and Venezuela. The dollar quota was raised to 2.1 million tons (then 2.2 million tons the following years) and the tariff was reduced to 75 euros per ton. The four countries were allocated almost 50% of the import licenses. Additionally, importing companies needed an export certificate delivered by the exporting country authorities and an import license specific to the country of origin. Although granted free by the European Commission in function of the type of operator, a semi-legal trade developed between import companies - due to the fact that importers would like to sell more bananas on the EU market than the regime allowed them to import.\(^{30}\)

33. *Bananadrama 1: The EU Banana Regime*, supra note 21. ACP stands for the group African, Caribbean, Pacific countries that signed the Lomé Convention with the European Union.
34. *Bananadrama 1: The EU Banana Regime*, supra note 21. ("The Lomé Convention was a trade and aid agreement that the EU signed in 1975 with 48 of its ex-colonies. These preferential trade arrangements permitted duty-free access for a range of commodities on which the economies of the ex-colonies are extremely dependent. From July 1993 until February 2000, 12 ACP countries that traditionally exported bananas to the EU market benefited from duty-free access to the EU market under the so-called 'Banana Protocol' of the Lomé Convention.")
nomic development of these countries; and to reconcile international obligations (notably under GATT\textsuperscript{35}) with national interests.\textsuperscript{36} However, the tariffs on the non-ACP countries by the EU’s banana regime created an oversupply of bananas that affected the remainder of the industry.\textsuperscript{37} Much of this surplus could be traced to Ecuador, which accounts for 34 percent of world banana exports and is the world’s largest banana exporter.\textsuperscript{38}

As an immediate response to the oversupply, U.S. multinational companies increased exports to the U.S., while seeking new markets in the “emerging economies” of Eastern Europe, Russia and Asia.\textsuperscript{39} For a time, these new markets were able to absorb large quantities of export bananas that could no longer be sold to the EU.\textsuperscript{40} However, the economic crises in Asia and Russia in 1998 caused banana exports to these areas to drop dramatically.\textsuperscript{41} By

\end{itemize}
mid 1999, the industry was clearly facing a structural oversupply without historical precedent.\textsuperscript{42}

In 1996, a little more than a year after the establishment of the World Trade Organization (WTO)\textsuperscript{43}, there were five countries – Honduras, Guatemala, Ecuador, Mexico and the United States – that lodged a complaint against certain elements of the banana regime which they considered ‘discriminatory’ to their interests\textsuperscript{44}. The United States, involved on behalf of their multinational companies, was especially keen to increase its access to the European market.\textsuperscript{45} Ecuador also claimed that they had insufficient access to the European market.\textsuperscript{46}

A panel report issued by the WTO on September 9, 1997, agreed that the EU banana regime was discriminatory and ordered the import regime amended.\textsuperscript{47} The WTO’s appellate body affirmed the panel’s conclusions in October 1997.\textsuperscript{48} In an attempt to comply with the WTO ruling, the EU revised its banana importa-

\textsuperscript{43} The World Trade Organization (WTO) was setup in January 1995 to promote trade liberalization which had been an agenda pursued by the General Agreement on Tariffs and Trade (GATT). \textit{World Trade Organization}, WTO, Banana Link, at http://www.bananalink.org.uk/trade_war/trade_war.htm (last visited Nov. 25, 2002).

(“When a complaint is filed with the WTO, the WTO’s Dispute Settlement Body (DSB) sets up a Special Group to resolve these complaint. This group is a panel of experts whose role it is to determine whether the policy challenged by the plaintiffs is compatible or not with the base principles of the WTO. This Special Group – or Panel - can summon any country, directly concerned or not, to appear before its experts.”)

\textsuperscript{45} \textit{See Id.}

\textsuperscript{46} \textit{See Id.}

\textsuperscript{48} “The WTO found that among the violated provisions were GATT Article XIII:1, which states that a country may not restrict the importation of a product from one member without similarly restricting importation of that product from all other members, and the Most Favored Nation clause, Article I:1, which requires that any ‘advantage, favor, privilege or immunity’ granted to one country with respect to a certain product be granted to all member countries with respect to that product.” \textit{Tainted Harvest: Child Labor and Obstacles to Organizing on Ecuador’s Banana Plantations, Banana Exports and Trade Regimes}, Human Rights Watch, (April 2002), available at http://www.hrw.org/reports/2002/ecuador/ecuad0402-07.htm#P1015_257403. \textit{See also European Communities-Regime for the Importation, Sale and Distribution of Bananas: Report of the
tion regime in January 1999.\textsuperscript{49} The new system continued to rely on tariff-rate quotas\textsuperscript{50} and complex licensing schemes, but also allocated over 90 percent of non-ACP country quotas to the "substantial suppliers" of EU bananas.\textsuperscript{51} Ecuador received 26.2 percent, Costa Rica 25.6 percent, Colombia 23.0 percent, and Panama 15.8 percent.\textsuperscript{52} However, these changes to the banana regime scheme were found to continue to violate the WTO. In April 1999, the WTO authorized the United States to impose trade sanctions of $191 million against the European Union.\textsuperscript{53} In March 2000, Ecuador also sought and obtained authorization to impose sanctions but abstained from using them.\textsuperscript{54}

\section*{C. The Dispute Resolution}

On April 11, 2001, after protracted negotiations, the U.S. and the EU agreed on a new EU banana importation regime.\textsuperscript{55} The U.S. agreed to suspend sanctions and worked to secure WTO authorization for the agreement.\textsuperscript{56} Through a two-stage process shifting tariff-rate quotas and licensing allocations based on companies' histories of supplying the EU and their import/export practices,\textsuperscript{57} the new importation scheme was designed to phase in a tariff-only

\begin{flushright}
\textsuperscript{50} Tariff Rate Quotas (TRQ) provide for imports at a favorable tariff up to a given limit. Beyond these limits imports are unlimited, although they are subject to higher tariffs. This is not a quota because a quota restricts imports to a given quantity, and TRQ don't limit trade. EU Institution Press Release, \textit{Facts and figures on EU Trade}, supra note 17. \\
\textsuperscript{52} \textit{Id.} \\
\textsuperscript{53} EU Institution Press Release, \textit{Facts and figures on EU Trade}, supra note 17. \\
system by 2006. Until 2006, however, traditional ACP countries will continue to have their own tariff-rate quota and licensing preferences, but all individual country quotas will be abolished.

After initially objecting to this plan, Ecuador reached an agreement with the EU which addressed Ecuador's primary concerns. A system was designed for allocating import licenses to protect Ecuadorian small and medium producers' license access. In return, Ecuador forfeited its right to impose sanctions on the EU and abandoned its efforts to prevent the European Union from obtaining a WTO waiver in order to allow temporary preferential treatment of ACP countries. Under the tariff-only system scheduled to begin in 2006, Ecuador will compete freely against other banana-producing countries for access to the EU market, as it does now for the U.S. market access. The success of the dispute settlement was visible immediately, as the Ecuadorian government statistics indicated that imports from Ecuador into the EU had increased since the implementation of the reformed EU banana regime in July 2001.

III. THE CONSEQUENCES OF THE TRADE DISPUTE RESOLUTION

Although this dispute resolution should result in increased profit for Ecuador, it will equate to nothing for banana workers if the Ecuadorian government and multinationals benefiting from

the workers' labor continue to deny workers their basic human rights to form and organize unions.67

Unions68 work to unite employees of a company to solve problems and gain protection against unfair treatment.69 An employer can mistreat a small number of employees easily. However, when all the employees unite, they can stand up to their employer without fear of getting fired or demoted.70 Workers in unions counter-balance the unchecked power of employers71 and help remedy discrimination because union contracts ensure that all workers are treated fairly and equally.72 Without a union, workers are left without a voice on the job to improve their lives, their families, their communities and their working conditions.73

The International Covenant on Civil and Political Rights declares that "everyone shall have the right to freedom of association with others, including the right to form and join trade unions for

68. See How and why people form unions, AFL-CIO, available at http://www.aflcio.org/aboutunions/joinunions/. A union is a group of workers who come together to win respect on the job, better wages and benefits, more flexibility for work and family needs, and a voice in improving the quality of their products and services.

70. See id.

71. See AFL-CIO, supra note 68.

72. See AFL-CIO, supra note 68.

73. See AFL-CIO, supra note 68. See also Human and Environmental Cost, Human Impact, Banana Link, available at http://www.bananalink.org.uk/impact/impact.htm (last visited Jan. 25, 2004). (Mentioning that poor living conditions, low wages, long exhausting hours, serious health hazards, child labor, sexual harassment are all other human rights concerns are a direct result of a lack of a union to protect workers against such violations).
the protection of his interests."74 It also states that "nothing in this article shall authorize States to take legislative measures which would prejudice, or to apply the law in such a manner as to prejudice the guarantees provided for in that Convention."75 The International Covenant on Economic, Social and Cultural Rights also provides workers with: "The right to form trade unions with no restrictions";76 "The right of trade unions to function freely subject to no limitations other than those prescribed by law and which are necessary in a democratic society";77 and "The right to strike, provided that it is exercised in conformity with the laws of the particular country."78 Both the International Labor Organization Convention concerning Freedom of Association79 and the Universal Declaration of Human Rights declare that banana workers have the right to associate and to form a union.80 The absences of these rights expose banana workers to an even longer list of concurrent problems with greater human rights concerns.81

75. International Covenant on Civil and Political Rights G.A., Article 22, Section 3.

77. International Covenant on Economic, Social and Cultural Rights, Article 8(1)(c).

While banana production in Central America, Panama and Colombia is often unionized, less than 1 percent of Ecuador's banana workers belong to a union.\(^8\) Wages for Ecuadorian banana workers are considerably lower than those of unionized banana workers elsewhere.\(^8\) Additionally, the numerous social benefits that banana unions in other countries have won for their members through long struggles are almost entirely absent in Ecuador's banana sector.\(^8\)

A. The Ecuadorian Government

While the Ecuadorian Constitution\(^8\) and Labor Code\(^8\) guarantees the right to organize, it does not require reinstatement of workers fired for union activity.\(^8\) Instead, an employer need only pay a relatively small fine for an anti-union dismissal, less than $400.

\(^8\) See Perillo, supra note 40. (These social benefits include health care, housing, electricity, potable water, education for their children). See also *Global Commodities: Bananas, Coffee*, Rural Migration News, October 2002, Volume 8, Number 4, at http://migration.ucdavis.edu/rmn/more.php?id=630_0_5_0. In 2000, banana workers earned from $60 a month in Ecuador to $150 to $200 in Honduras and $200 to $300 a month in Colombia.

\(^8\) Labor Code, Articles 447, 467, available at http://natlex.ilo.org/txt/S97ECU01.htm.; see also ILO Convention, supra note 79.

in most cases involving a banana worker. In Ecuador, most large-scale producers employ a system of temporary contract labor that severs the formal link between employer and employee. Work teams, or "cuadrillas," consisting of 12 to 15 workers which are paid by the day or by the task. The team leader, or "jefe de cuadrilla," may in fact be a formal employee of the plantation, but he contracts the rest of the "cuadrilleros." This is how many banana workers drop to the title of "non-union workers." As temporary workers they do not fall under labor legislation and are generally excluded from all social security, employment, and health care benefits.

Ecuador's refusal to impose its own Labor Code provisions that govern labor contracts along with the ambiguity of those provisions allows employers to create a defenseless "permanent temporary" workforce in the banana sector. The lack of enforcement is what allows for "the informal use of consecutive contracts and multiple project contracts." Short term contracts are run in succession, one after the other, for many months or years on end, which creates an unstable "permanent temporary" workforce. The problem with creating a work force like this is that these workers are not entitled to benefits due to employees recognized as permanent in the eyes of the law, and their employers are not bound by Labor

89. Human Rights Watch, Summary, supra note 15. ("The Labor Code also permits the use of temporary contracts, not to exceed thirty days, for workers hired to attend to emergencies or extraordinary business needs that, unlike the everyday processing or field activities of banana workers, are not linked to the normal activity of the employers. Seasonal contracts may also be used to hire workers for cyclical labor and are understood to create the right for such workers to be hired back the following cycle or season. As banana production in Ecuador is not cyclical and, instead, involves the performance of all phases of production activity year-round, seasonal contracts are generally not used in the sector."). See also Labor Code, Article 17, available at http://natlex.ilo.org/txt/S97ECU01.htm.

90. See Perillo, supra note 38.
91. See Perillo, supra note 38.
92. See Perillo, supra note 38; See also Labor Code, Articles 14, 16, available at http://natlex.ilo.org/txt/S97ECU01.htm.
95. Human Rights Watch, Summary, supra note 15.
Code provisions that prohibit anti-union dismissals.\textsuperscript{96} If the temporary workers are suddenly told not to return to work the following day or week, they have not technically been fired; they have simply not been rehired.\textsuperscript{97} As such, the Labor Code does not explicitly prohibit anti-union discrimination in rehiring.\textsuperscript{98}

The use of subcontracted labor has also raised unreasonable obstacles to worker organizations.\textsuperscript{99} Subcontracted workers, like “permanent temporary” workers, lack employment stability.\textsuperscript{100} Subcontracted workers do not have the legal rights to organize and collectively bargain with the companies and employers benefiting from their labor, despite the fact that these companies may determine their wages, benefits, and working conditions.\textsuperscript{101} These subcontracted workers are, instead, able to organize and negotiate collectively only with their subcontractors and not the company.\textsuperscript{102} Another obstacle employers frequently use is to place workers in groups of less than thirty workers, which avoid the thirty worker requirement by law to form a workers’ organization.\textsuperscript{103}

The deterrent to unionize is so strong in Ecuador that the organization of banana workers has been significantly shut down.\textsuperscript{104} The constitutionally and internationally protected right to freedom of association has been rendered a fiction for most banana workers

\textsuperscript{97} Human Rights Watch, \textit{Summary}, \textit{supra} note 15.

in the sector. As a result of the impediments to and risks in exercising the right to freedom of association, workers have successfully organized on only roughly five of the more than 5,000 registered banana plantations in Ecuador, and only approximately 1,650 of the 120,000 to 148,000 banana workers are affiliated with workers' organizations. This lack of affiliation helps make Ecuador the world leader in banana exports and will only encourage Ecuador to continue social deregulations to keep production costs low in order to reach the expanded EU market.

B. Multinational Corporations

Since their creation at the end of the 19th Century, multinational companies succeeded in maintaining extremely high profit margins by combining inexpensive overseas raw materials and labor markets with European and U.S. management and capital. While there are legitimate arguments that foreign investment creates work that did not previously exist in developing countries, multinational banana producers tend to repatriate most of their profits to their countries of origin. Only 12% of the final price stays in the producing countries, while an even smaller proportion goes to small farmers (5-10 per cent) or to plantation workers (1-2 per cent). To produce large amounts of cheap, unblemished bananas to sell, the multinational companies favor very intensive

methods of production, using large volumes of fertilizers and pesticides to increase the amount of input. In a situation of oversupply, as was the case in 2000, prices paid to independent producers were systematically below production costs, forcing wages down.

In recent years, these big companies have tried to free themselves of direct ownership of plantations, in favor of guaranteed supply contracts with medium- and large-scale producers in the countries where they operate. This tactic allows the multinational headquarters to avoid culpability for labor and environmental conditions and shifts this responsibility onto local producers by claiming to be only the buyers of these goods. The multinationals argue that the supplier plantations are private property over which they have no jurisdiction and that the decisions regarding labor matters are the prerogative of the landowners and therefore out of their hands. Although the governments are still the primary bodies accountable for upholding human rights everywhere, the multinational are fully aware of the production methods and

113. Work on banana plantations exposes workers to pesticides so hazardous that the EPA bans them in the United States. Two of them, diazinon and chlorpyrifos, are sprayed on plastic sheets which workers use to wrap the bunches. The EPA cautions that they're especially dangerous to children, even in low doses. Both are organophosphates, originally developed as nerve gas agents in World War II. David Bacon, *Blood on the Bananas*, 6/12/02 available at http://www.kclabor.org/blood_on_the_bananas.htm.

114. See Banana Link, Companies, supra note 23. See also *Human and Environmental Impact*, Banana Link, supra note 81. ("The increase in exports from these regions in the past decades or so has been achieved mainly through increasing the amount of inputs (fertilizers and pesticides) and the area under cultivation.").

115. See Banana Link, Companies, supra note 23.

116. See Banana Link, Companies, supra note 23.

119. See Corporate Responsibility Report, Standards for Independent Banana Growers, Chiquita Brands International, Inc., available at http://www.chiquita.com/chiquitacr1/4cases/cro72.asp. Chiquita states in this report that Ecuador’s expansion has been fueled by lower labor, social, and environmental standard than are generally present in the rest of Latin America.
lack of union representation from the companies whom they benefit.\textsuperscript{120} The responsibility of the multinationals for these human rights violations of banana workers is therefore inescapable.\textsuperscript{121}

The failure of the Ecuadorian government to enforce its labor laws results in human rights abuse that underlies the production of millions of metric tons of bananas supplied to exporting corporations every year.\textsuperscript{122} This lack of sufficient legal protections for workers' rights allows banana producers to violate workers' rights with impunity.\textsuperscript{123} Exporting corporations contract directly with these national producers and benefit from these violations by receiving bananas at almost half the market price,\textsuperscript{124} produced under abusive labor conditions and by workers making barely enough to survive.\textsuperscript{125} In fact, multinationals export over four million metric tons of Ecuadorian bananas annually, but have disclaimed any obligation to demand respect for workers' rights on third-party plantations from which they purchase bananas for export.\textsuperscript{126}

When labor rights abuses occur on these plantations and exporting corporations fail to take remedial steps to ensure respect for workers' rights, multinationals not only facilitate the problems

\textsuperscript{120} Human Rights Watch, Banana Exporting Companies, \textit{supra} note 118. \textit{See also} Pierre Sane, \textit{Why Human Rights Should Matter to the Business World}, UN Reform, (January 8, 2001) at \url{http://www.globalpolicy.org/reform/2001/0108ps.htm}.

\textsuperscript{122} Human Rights Watch, \textit{Summary}, \textit{supra} note 15.

\textsuperscript{123} Human Rights Watch, Banana Exporting Companies, \textit{supra} note 118.

\textsuperscript{124} "A 20 kilogram (43 pound) box of bananas sells in Ecuador for $2 to $3, and is worth $25 in the United States or Europe." \textit{Global Commodities: Bananas, Coffee}, Rural Migration News, October 2002, Volume 8 Number 4, at \url{http://migration.ucdavis.edu/rmn/archive_rmn/oct_2002-20rmn.html}. \textit{See also} Andrew Bounds, \textit{Banana Wars}, Latin Trade, (June 2001), at \url{http://www.uwec.edu/geography/Ivogeler/w111/articles/BananaWars.htm}. Ecuador is selling below cost, at around $1.50 for a 42-pound box. Costa Rican bananas, by comparison, cost $4.40 a box to produce and sell for about a dollar more ($5.50).

\textsuperscript{125} The average salary of Ecuadorian Banana workers amounted to only $5.44 a day with no insurance. The result is that two working adults in a family of four often make less than the almost $300 a month that Ecuador's labor ministry estimates is the basic cost of living in the banana-producing region. Jim Lobe, \textit{Labor Abuses Rampant in Banana Plantations}, OneWorld US, (April 25, 2002) at \url{http://www.corpwatch.org/news/PND.jsp?articleid=2409}.

but also benefit from these violations.\textsuperscript{127} The reality is that governments, such as Ecuador, see multinationals as not only providing benefits to the economy of the host nation but also providing benefits to the political leadership who is credited with the growth in the overall economy of the nation.\textsuperscript{128} These governments compete for multinational favors\textsuperscript{129} by offering them short-term advantages. In exchange, these governments hope that acceleration in national development will soon follow.\textsuperscript{130} The wholesale giants who are daily gaining greater control over the terms of trade need to accept culpability for labor and environmental conditions and break this damaging cycle of competition if they want real credibility as responsible corporate citizens.\textsuperscript{131}

IV. WHAT IS THE ANSWER?

The biggest beneficiaries of the WTO Settlement, the Ecuadorian government and the US multinationals, are also the groups most responsible for the failure of banana workers to have a right to association.\textsuperscript{132} The legislation needed to solve these problems, although ambiguous, is already in place in Ecuador.\textsuperscript{133} However, the entity enforcing this legislation is the Ecuadorian government, which has repeatedly neglected to strictly enforce the portions of their law that guarantee workers the right to organize.\textsuperscript{134} The mul-

\begin{itemize}
\item \textsuperscript{127} Human Rights Watch, Summary, supra note 15.
\item \textsuperscript{129} An example of the advantages given to multinationals is reduced labor and production cost. Because of the non-union labor of Ecuador, the country is selling below cost, at around $1.50 for a 42-pound box. Costa Rican bananas, by comparison, cost $4.40 a box to produce and sell for about a dollar more ($5.50). Andrew Bounds, Banana Wars, Latin Trade, (June 2001), available at http://www.uwec.edu/geography/Ivogeler/w111/articles/BananaWars.htm. The result is a shift in much of big 3 multinationals (Chiquita (United Brands), Dole Farming Company, and Del Monte) production to Ecuador, which is now the world's largest exporter. lyst that banana workers need to begin the necessary process of social change required.140

A. U.S. to the Rescue

The Ecuadorian banana workers should bring suit against the participating U.S. multinationals in U.S. courts. The Alien Tort Claims Act (ATCA)141 allows a foreign plaintiff to bring suit against U.S. defendants.142 In John Doe I v. Unocal Corp., the court of appeals determined that no state action was required in order for the oil companies to be liable for the alleged violations under the ATCA.143 There was sufficient evidence to preclude summary judgment with respect to whether the oil companies aided and abetted the military in subjecting the villagers to forced labor, murder, and rape.144

The denial of the right to organize is a violation of several international laws, all of which have been signed by the United States.145 Multinational corporations may think they have relative impunity because they are not the direct employers of the workers

140. An example of the slow process of change is that after over 11 months of harassment, firings, and two brutal violent attacks on striking workers, striking banana workers on the Los Alamos Plantation in Ecuador ended their struggle on November 28, 2002 and returned to work under terms of an agreement that won them health benefits and medical care for injuries resulting from attacks on May 16, 2002, but little else. Despite significant pressure on Alvaro Noboa, owner of the plantation’s management refused to negotiate a collective bargaining agreement to improve wages and working conditions. Noboa Workers Reinstated, Win Medical Benefits. New Campaign Begins, US/LEAP Action Alert, US/LEAP, (Dec. 13, 2002), available at http://www.usleap.org/Banana/bananatemp.html#noboa.
141. 28 USCS § 1350 – District Court shall have original jurisdiction of any civil action for a tort only committed in violation of the law of nation or a treaty of the United States.
143. Id. at 32.
144. See id. at 58 (“The crimes of forced labor, murder, and rape were considered jus cogens violations. Jus cogens violations are violations of norms of international law that are binding on nations even if they do not agree to them.”).
and they are not directly denying the workers their rights. However, in order to qualify as aiding and abetting under international criminal law, assistance need not constitute an indispensable element, that is, a *sine qua non* for the acts of the principal. Rather, it suffices that the acts of the accomplice have a substantial effect on the commission of the criminal act by the principal. The acts of the accomplice have the required substantial effect where the criminal act most probably would not have occurred in the same way without someone acting in the role that the accomplice in fact assumed.

In *Doe v Unocal Corp.*, Unocal had a 28% interest in the Myanmar Oil Project (the Project) to produce, transport and sell natural gas from deposit in Myanmar. Unocal had knowledge that the Myanmar military provided security and other services for the Project. Unocal was also made aware, several times and by several different methods, of the Myanmar military's use of forced labor and of the other human rights violations that the military employed in connection with the Project. Despite having this knowledge, Unocal chose to listen to the assurance of the Myanmar military that no human rights abuses were occurring in the area of pipeline construction. Unocal and its partner in the project, To-

147. *Sine qua non* (see-nay kwah nahm) prep. Latin for "without which it could not be," an indispensable action or condition. Example: if Charlie Careless had not left the keys in the ignition, his 10-year-old son could not have started the car and backed it over Polly Playmate. So Charlie's act was the *sine qua non* of the injury to Playmate.
149. *Id.* at 46.
150. *Id.* at 46.
151. *Id.* at 4. Burma had been ruled by a military government since 1958. In 1988, a new military government took control and renamed the country Myanmar.
152. *Id.* at 6.
153. *Id.* at 12-20. ("Several Plaintiffs testified that the Myanmar military subjected them to act of murder, rape and torture. Unocal was informed by its own employee, consultants, by partners in the project and by human rights organizations, that the Myanmar military was using forced labor and committing other human rights violations in connection with the Project. In fact, in December 11, 1995, Unocal Consultant John Hassesman reported to Unocal that the military's most common human rights violations are 'forced relocation without compensation of families from land near/along the pipeline; forced labor to work on infrastructure projects supporting the pipeline...'.")
tal, made the statement that even if forced labor were being used, they did not have a responsibility to monitor the military's behavior. This evidence was enough for the district court to hold that a reasonable fact finder could find Unocal's conduct met the standard for aiding and abetting.

The denial of union association and the use of forced labor are both violations of the Universal Declaration of Human Right as well as a number of other international treaties. In *Doe v. Unocal*, the court recognized that crimes of this nature, that are so widely condemned, reach the status of a *jus cogens* and therefore do not require state action to fall under the ATCA. Multinationals in Ecuador continue to aid and encourage banana producers to violate human rights of workers by accepting bananas from these producers, despite having full knowledge of these crimes. Similar to the corporate defendant in *Doe v. Unocal*, multinationals have knowledge of the crimes, yet they deny culpability for these crimes from which they profit. Because these violations of human rights would mostly likely not occur if the banana producers where not trying so desperately to increase production for multinational favor, the Ecuadorian workers would have a cause of action under the ATCA that would probably survive summary judgment.

See also S & Davis Int'l, Inc. v. Yemen, 218 F.3d 1292, 1301 (11th Cir. 2000). (*"Interpreting § 1605(a)(1), the Supreme Court held 'we [do not] see how a foreign state can waive its immunity under § 1605(a)(1) by signing an international agreement that contains no mention of a waiver of immunity to suit in United States courts or even the availability of a cause of action in the United States.'*).
160. See Banana Link, Companies, *supra* note 23; Human Rights Watch, Banana Exporting Companies, *supra* note 118; Human Rights Watch, Summary, *supra* note 15. (Explaining that despite receiving over 85% of the profits from the exporting of over 4 million metric tons of bananas, multinationals still do not accept culpability for the human rights violations of banana workers in Ecuador).
The workers may also be able to sue the country of Ecuador itself, even though the U.S. courts usually do not allow plaintiffs to sue a foreign nation. However, if the nation falls into one of the several exceptions, then jurisdiction becomes proper for the foreign state and the U.S. court is allowed to decide the case. Ecuador possibly falls under at least one of the exceptions of the Foreign Sovereign Immunities Act listed in 28 USC § 1605. Under Section (a)(2), a foreign state shall not be immune from jurisdiction of courts of the United States in any case in which the action is based on an act outside the U.S. in connection with a commercial activity of the foreign state elsewhere and that act causes a direct effect in the United States. For example in S & Davis Int'l, Inc. v. Yemen, the commercial activity was a contract for the foreign state's purchase of grain from a private U.S. dealer, where the for-

164. See 28 U.S.C.S. § 1330 (2003) (stating that "under the Foreign Sovereign Immunities Act, 1602, a district court has jurisdiction over a civil action against a foreign state—including its political subdivisions, agencies, or instrumentalities—only if one of several exceptions to foreign sovereign immunity applies").

165. See 28 USC § 1605 (2003). ("General exceptions to the jurisdictional immunity of a foreign state (a) A foreign state shall not be immune from the jurisdiction of courts of the United States or of the States in any case— (2) in which the action is based upon a commercial activity carried on in the United States by the foreign state; or upon an act performed in the United States in connection with a commercial activity of the foreign state elsewhere; or upon an act outside the territory of the United States in connection with a commercial activity of the foreign state elsewhere and that act causes a direct effect in the United States.").

166. Id.

167. S & Davis Int'l, Inc. v. Yemen, 218 F.3d 1292, 1301 (11th Cir. 2000). ("Interpreting § 1605(a)(1), the Supreme Court held 'we [do not] see how a foreign state can waive its immunity under § 1605(a)(1) by signing an international agreement that contains no mention of a waiver of immunity to suit in United States courts or even the availability of a cause of action in the United States.'").

168. 28 U.S.C. § 1603(d) (2003). ("A 'commercial activity' means either a regular course of commercial conduct or a particular commercial transaction or act. The commercial character of an activity shall be determined by reference to the nature of the course of conduct or particular transaction or act, rather than by reference to its purpose.").

169. See Davis, 218 F.3d at 1298 (Stating that "the 'direct effects' component of the commercial activity exception to sovereign immunity is inextricably intertwined with the "minimum contacts" component of the personal jurisdiction issue...").

170. 28 U.S.C. § 1605 (a) (2). See also Davis, 218 F.3d at 1302 ("Stating 'import-export transactions involving sales to, or purchases from, concerns in the United States' are included within the conduct of the first clause of § 1605(a)(2) and defining commercial activity under § 1603(d) to include 'a single contract, if of the same character as a contract which might be made by a private person'.")
eign government agency "was more involved than a mere regulator, and whose directives, not based upon regulatory reasons, controlled" the foreign corporations actions.\textsuperscript{171} Thus, because the court considers the contract for the purchase of grain a commercial activity, the production and selling of bananas in Ecuador to U.S. consumers could also be considered a commercial activity.

However, the actual violation of a failure to protect the banana workers' right to organize is not likely to be viewed as a commercial activity by the Supreme Court.\textsuperscript{172} The Supreme Court held in \textit{Saudi Arabia v. Nelson} that "a state engages in commercial activity where it exercises only those powers that can also be exercised by private citizens, as distinct from those powers peculiar to sovereigns."\textsuperscript{173} In \textit{Nelson}, although the Saudi Government subjected Nelson to the abuse alleged as retaliation for his persistence in reporting hospital safety violations, Nelson argued that "the character of the mistreatment was consequently commercial."\textsuperscript{174} However, the Supreme Court stated that "this argument does not alter the fact that the powers allegedly abused by the Saudi government were those of police and penal officers."\textsuperscript{175}

Ecuadorian workers can argue that the government's lack of enforcement of its Labor Codes keeps the cost of its bananas low and is in character a commercial activity.\textsuperscript{176} However, like the Saudi government's actions in \textit{Nelson}, this action (or non-action) is a power peculiar to a sovereign state.\textsuperscript{177} Therefore, it seems unlikely that Ecuador would fall under one of the exceptions to the Sovereign Immunity Act by not enforcing its labor codes and protecting its banana workers' rights to form unions.\textsuperscript{178}

\textsuperscript{171} \textit{Davis}, 218 F.3d 1292, 1303.
\textsuperscript{172} \textit{See} Saudi Arabia v Nelson, 507 U.S. 349 (1993). Action brought against Kingdom of Saudi Arabia by American citizens employed at Saudi hospital, based on alleged personal injuries resulting from unlawful detention and torture by Saudi Government, was not "based upon a commercial activity."
\textsuperscript{173} \textit{Id.} at 360.
\textsuperscript{174} \textit{Id.} at 363.
\textsuperscript{175} \textit{Id.} at 364.

\textsuperscript{178} \textit{Id.}
The likelihood that Ecuadorian banana workers who barely make enough money to survive will have enough money to bear the cost of a lengthy litigation process against huge multinationals is highly improbable.179 The most plausible solution by the U.S. would be to use its trade policy leverage to oblige Ecuador into changing its legislation and foreign policies. The United States has a history of enacting legislation, such as sanctions (either boycotts or embargoes),180 that encourage changes in the governments of foreign countries that are not in agreement with U.S. policies.181

When looking at the fact that the U.S. imports approximately 25% of Ecuador’s total banana exports,182 the affect of a U.S. embargo against Ecuadorian bananas becomes apparent.183 Also, the U.S. could enact narrowly targeted trade sanctions or blocking trades with multinationals that have been shown to engage in busi-

179. See Lobe, supra note 125. See also Unocal 2002 U.S. App. LEXIS 19263. The original claim for this case was filed in Central District Court of California in September of 1996. The Ninth Circuit Court of Appeals did not hear and decide on the Plaintiff’s appeals until December 3, 2001.

180. Sanctions are any inducement to individuals or groups to follow or refrain from following a particular course of conduct. Sanctions may include boycotts or embargoes. Available at http://www.encyclopedia.com/html/si/sanction.asp.

181. Micheal Paulson, History of U.S. Sanction shows most haven’t worked, Seattle Post-Intelligencer, (May 11, 1999), available at http://seattlepi.nwsource.com/iraq/sanction.shtml. (“Sanctions played a role in helping to force the apartheid government of South Africa to allow democratic elections, and State Department officials claim economic sanctions helped force Serbia to the negotiating table over the war in Bosnia and limited Iraq’s ability to rebuild its military after the 1991 Gulf War. A recent study by the Center for Strategic and International Studies cited three other successes: blocking the Russian transfer of sophisticated cryogenic rocket engines to India after trade sanctions were threatened in July 1993; halting South African arms shipments to Syria after a U.S. threat to withhold aid in January 1997, and imposing targeted sanctions against China to cease exports of sensitive military equipment.”).

183. Id. See also Daniel T. Griswold and Aaron Lukas, Cato Handbook for the 106'th Congress, Chapter 56, Trade Sanctions, pg. 555, available at http://www.freetrade.org/pubs/handbook/hb106-56.pdf (“There is a raft of countries subjected to more specific sanctions, responding to a particular behavior, and barring a particular import or a certain type of government assistance.”) See also Paulson, supra note 181 (“For instance, Gambia and Burundi have been denied money from the Overseas Private Investment Corp. because of military coups there.”).
ness with Ecuadorian plantations that are violating human rights.\textsuperscript{184} Although the sanctions would encourage change by both the multinationals and the Ecuadorian government, there has been a strong movement to eliminate U.S. embargoes because of the harmful effect they have on the U.S. economy and the poor and vulnerable people of the target countries.\textsuperscript{185}

Another method of persuasion could be eliminating aid and benefits to Ecuador.\textsuperscript{186} Suspending bilateral aid and benefits are viable ways to signal strong disapproval of the actions of foreign governments.\textsuperscript{187} A failed example of the type of action that the U.S. could have used was demonstrated under the U.S. Andean Trade Promotion and Drug Eradication Act (ATPDEA).\textsuperscript{188} On September 25, 2002, the United States granted ATPDEA benefits to Bolivia, Colombia and Peru, but not Ecuador.\textsuperscript{189} According to the Act, before granting ATPDEA benefits, the United States must take into account "the extent to which the country provides internationally recognized worker rights, including... the right of association; the right to organize and bargain collectively."\textsuperscript{190}

("Title XXXI of the Trade Act of 2002, the Andean Trade Promotion and Drug Eradication Act, renews the Andean Trade Preference Act. The renewal is retroactive to December 4, 2001, the date the Andean Trade Preference Act expired. The Andean Trade Preference Act extends preferential duty-free treatment to a large number of products exported to the U.S. from Bolivia, Colombia, Ecuador and Peru, including a
At the time, Ecuador faced considerable international pressure to investigate the anti-union violence on the Noboa Corporation's Los Alamos banana plantations. The inadequacy of Ecuadorian labor law protecting the right to organize, the right to bargain collectively, and the failure of the system to ensure the basic rights of the Alamos workers called into serious question the country's eligibility for ATPDEA designation. Prior to the signing of the agreement, Ecuador made several general commitments to the United States to improve deficient labor law enforcement and review laws on freedom of association that unfortunately fell far short of international standards.

The United States granted Ecuador enhanced trade benefits under the U.S. ATPDEA on October 31, 2002, even though Ecuador failed to comply with the Act's labor rights requirements. Despite the failure to fully encourage improvement of working conditions of Ecuadorian banana workers, these actions prove that the U.S. has not only the ability but opportunity to influence Ecuador to change its labor laws for the better.

("Today President George W. Bush signed into law the Trade Act of 2002, an omnibus trade bill that grants the President the authority to negotiate international trade agreements subject to a single 'yes' or 'no' vote by Congress without amendments. The Trade Act of 2002 also provides trade adjustment assistance for U.S. workers displaced by foreign trade, renews and expands the Andean Trade Preference Act, and renews the U.S. Generalized System of Preferences.

Trade promotion authority, formerly known as "fast track" authority, authorizes the President to negotiate international trade agreements that Congress can accept or reject, but not amend. Trade promotion authority had been granted to five former presidents until it expired in 1994. Title XXI of the Trade Act of 2002, the Bipartisan
B. Ecuador's Government

Ecuador should amend and enforce its labor codes to protect banana workers and become more directly involved with the banana exporting process to help control the banana market to produce a stable income source for workers. Ecuador has several options to remedy this problem. Ecuador could amend the Labor Code to require the reinstatement of permanent workers fired for engaging in union activity and payment of wages lost during the period when the workers were wrongfully dismissed. Where reinstatement is impossible, compensation for dismissal should be substantially higher than for other illegal terminations.

The Labor Code should also provide that temporary workers and workers with project contracts who are fired for exercising the right to freedom of association have the right to reinstatement until the conclusion of their short-term contracts and payment of any lost wages incurred during the period of wrongful dismissal. If reinstatement is not possible, those workers who were dismissed should be substantially rewarded for their anti-union dismissal. The labor law should also explicitly prohibit anti-union discrimination in hiring and employers from interfering in the establishment or functioning of workers' organizations, as prohibited by the ILO.

201. US/LEAP, *supra* note 192. See also The International Labour Organization, *About the ILO*, available at http://www.Ilo.org/public/english/about/index.htm. ("The International Labor Organization (ILO). The International Labor Organization is the UN specialized agency which seeks the promotion of social justice and internationally recognized human and labor rights. It was founded in 1919 and is the only surviving major creation of the Treaty of Versailles which brought the League of Nations into being and it became the first specialized agency of the UN in 1946. The ILO formulates international labor standards in the form of Conventions and Recommendations setting minimum standards of basic labor rights: freedom of association, the right to..."
Ecuador could also become more directly involved with the banana exporting process. The price of Ecuadorian bananas is significantly lower than other exporting countries. If Ecuador adopts the necessary regulatory changes it can establish international marketing conditions of its banana production. To avoid price decrease more than what the cyclical market imposes, the country can discriminate prices according to those markets where it sells. A price must be allocated to each market, so that exporters can agree with producers how much they are going to buy for each market and a price will automatically be established. By making prices more stable for the producer, it brings a higher and more consistent profit margin to producers, thereby alleviating the pressure to keep workers from forming unions for their benefit.

C. Multinationals

Dole and Chiquita are both major corporations who export large quantities of Ecuadorian bananas. Both corporations are also signatory members of the workplace code of conduct SA8000. They should therefore fulfill their public commitment

organize, collective bargaining, abolition of forced labor, equality of opportunity and treatment, and other standards regulating conditions across the entire spectrum of work related issues.

See also ILO Convention, supra note 79.

"Ecuador is the world's largest exporter of bananas and has been increasing its market share by selling bananas at a significantly lower price than exporters in Central America."). Human Rights Watch, supra note 198.

SA8000, Social Accountability International, available at http://www.cepaa.org/ ("The first standard to be fully operational is Social Accountability 8000 (SA8000), a workplace standard that covers all key labor rights and certifies compliance through independent, accredited auditors. This standard specifies requirements for social accountability to enable a company to: a) develop, maintain, and enforce policies and procedures in order to manage those issues which it can control or influence; b) demonstrate to interested parties that policies, procedures and practices are in conformity with the requirements of this standard. The requirements of this standard shall
to monitor labor conditions on third-party supplier plantations, begin to bring all suppliers into compliance with Ecuadorian labor law and SA8000 standards as soon as possible and at least within the reasonable period of 180 days, and report publicly on such efforts on at least an annual basis.

Chiquita should ensure that all external agreements negotiated with trade union bodies or other third parties that address labor rights on Chiquita's supplier plantations, like the "IUF/COLSIBA and Chiquita Agreement on Freedom of Association, Minimum Labor Standards and Employment in Latin American Banana Operations," meet or exceed the standards set forth in the company's internal code of conduct.

V. Conclusion

The right to freedom of association is one of the principles in which this country was founded. Although this was a fundamental right given by the Constitution, history shows U.S. that this right was not always guaranteed and that this right was solidified only through the fight and hard work of many men and women. History also shows that without the help of unions and the right to free

apply universally with regard to geographic location, industry sector and company size.

212. U.S. CONST, amend. I.
213. See The Pullman Strike, Chicago, 1894. Available at http://www.cc.ukans.edu/kansas/pullman/index.html. The Pullman strike of 1894 was the first national strike in the United States. It involved over 150,000 person and twenty-seven states and territories and would paralyze the nations railway system. In supporting the capital side of this strike, President Cleveland sent federal troops, who would fire and kill up to 20 U.S. citizens and wounding another 20, all against the wishes of the states. The federal court of the nation outlawed striking by the passing of the Omnibus indictment. This blow to unionized labor would not be struck down until the passing of the Wagner act in 1935. See also Hansen. Curtis, The Battle of the Overpass. Available at http://www.reuther.wayne.edu/exhibits/battle.html. This was another example of the early struggles of unions. The Battle of the Overpass is one of the most famous events in the history of the American labor movement. This set in motion the series of event, which after four year of efforts, resulted in a crippling at the Rouge Plant, the successfully NLRB election and final recognition of the UAW by Ford Motor Company, in May 1941.
association (to strike), American workers would not have secured fair wages and decent working conditions.\textsuperscript{214} We now celebrate the first labor unions' efforts through the national holiday Labor Day, but it seems as though we have forgotten the hard work and struggle involved in achieving better working conditions and fair wages.\textsuperscript{215} By extending U.S. Trade benefits to Ecuador, we are actually encouraging the same problems that our forefathers worked so hard to alleviate in our own country.\textsuperscript{216} While the U.S. may not be able to completely alleviate the situation, it does have the power to thoroughly discourage it.\textsuperscript{217} Although the recent extension of trade benefit to Ecuador is a step backwards, it should not be the final step. Hopefully, those fighting in the U.S.\textsuperscript{218} for Ecuador can one day convince others that in taking a stand for Ecuador's banana workers, they are actually taking stand for the American worker.

These two situations are very similar to the legal non-violent strike on the Los Alamos plantations in May of 2002. \textit{See supra note 3.}
